Course Introduction

**— ePASS Course Introduction—**

Welcome to the ePASS County Security Delegate course.

The topics in this course are designed to help you learn how to use ePASS to complete the business processes that are required for county security delegate activities.

The Department of Health & Family Services has worked with county and other business partners to identify a specialized user we call the "Security Delegate" who are responsible for managing the Wisacwis user accounts. Only Security Delegates, back-up delegates and DHFS staff with security responsibilities will be authorized to access and process requests through this application.

There are five topics to complete for Intake:

- Introduction
- New Request
- Change Request
- Explore
- Password Reset
- Delete Request

Click [Next](#) to begin the introduction to ePASS.

The screenshot shows a web browser window titled "ePASS On-line Training - Microsoft Internet Explorer provided by DHFS - State of Wisconsin". The browser's address bar is empty. The page has a green header bar with a logo on the left, "Module: ePASS" in the center, and "Topic: Overview" on the right. Below the header, the page number "Page 02 of 11" is displayed, followed by navigation links: "Index", "Exit", "Menu", "Prev", and "Next". The main content area has a light green background and a blue border on the left. It features a section header "— Topic Introduction —" followed by a paragraph explaining the ePASS system. A bulleted list details the system's functions: requesting security access for new workers, changing information for existing workers, password changes for existing workers, and deleting inactive workers. Another paragraph describes the workflow from supervisor request to DHFS network security staff. A final paragraph mentions email notifications and the ability to view request status. The page concludes with a "Click [Next](#) to continue." instruction.

**— Topic Introduction —**

The web-based eWISACWIS Production Access Security System (ePass) is a tool to be used by the Department of Health & Family Services, Division of Children and Family Services and its key business partners to facilitate the security and access request processing needs. The system automates:

- Requests for security access for new workers
- Changes in information for existing workers
- Password changes for existing workers
- Deletion of an inactive worker from the system

Supervisors create or update worker information in WiSACWIS. County Security Delegates then submit requests in ePass on behalf of their county workers. DHFS WiSACWIS Security Officers will review and approve the requests then forward the requests to DHFS network security staff for appropriate setup.

Once a request is complete, email notifications are sent to the county worker, supervisor and Security Delegate. The Security Delegate can also view the status of their request via ePass.

Wisconsin Department of Health and Family Services

Each time you log into ePASS, you will need to enter your State of WI login id and password.

Only those workers identified as the security delegate who have submitted the proper request for authorization will be able to log into ePASS. If you believe you should be able to log in, but cannot, contact the Security Liaison or the Helpdesk.

To self-register for a Wisconsin ID and password, you can click on the link: Request a Wisconsin User ID and Password found on the ePASS home page below the Login button.

To receive access to ePASS, submit your new State ID and request for ePASS to [epass@dhfs.state.wi.us](mailto:epass@dhfs.state.wi.us).

Wherever you are in ePASS, you will have access to navigation tools you can use to complete work in ePASS. You will also have a set of other useful links at your fingertips. There are three main navigation sections on each page:

1. The top DHFS bar
2. The side ePASS bar
3. The bottom information bar

Click one of the three highlighted areas for more information about the contents of that part of the screen.

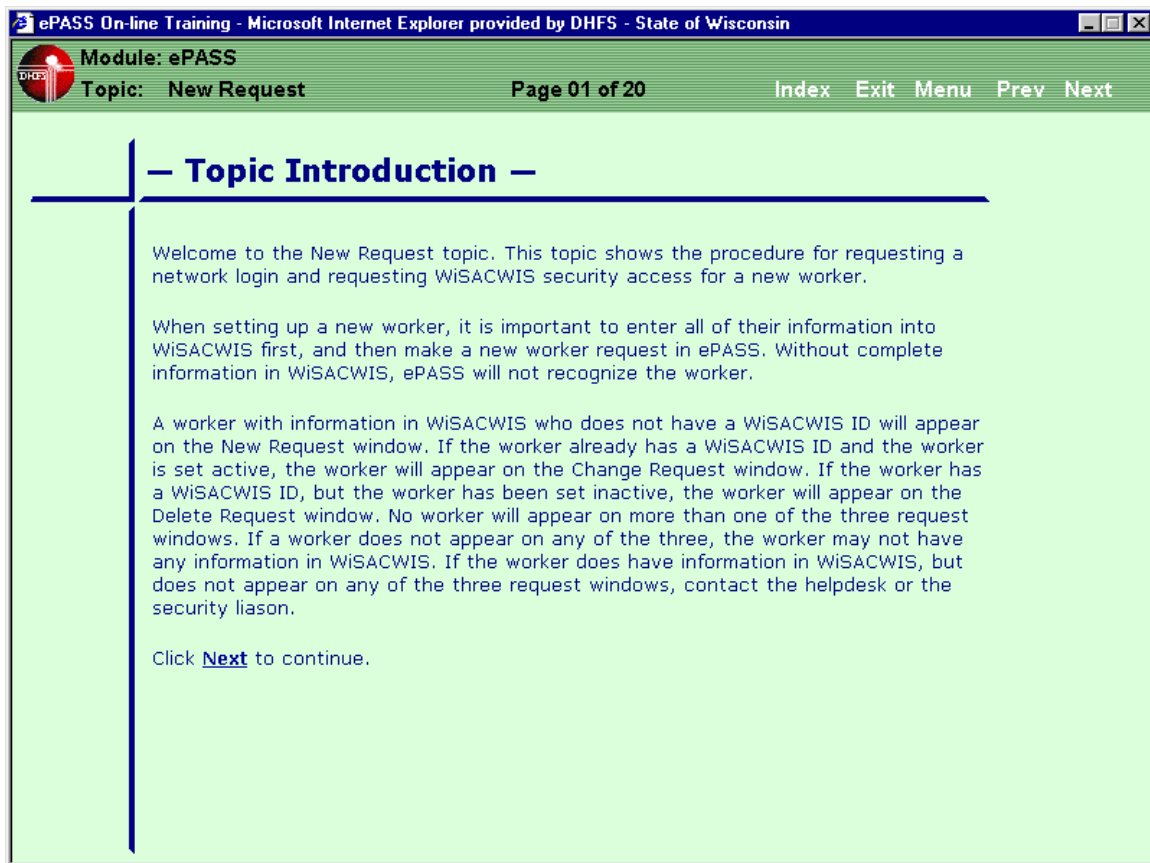

When finished, click [Next](#) to continue.

## — Topic Introduction —

Welcome to the New Request topic. This topic shows the procedure for requesting a network login and requesting WiSACWIS security access for a new worker.

When setting up a new worker, it is important to enter all of their information into WiSACWIS first, and then make a new worker request in ePASS. Without complete information in WiSACWIS, ePASS will not recognize the worker.

A worker with information in WiSACWIS who does not have a WiSACWIS ID will appear on the New Request window. If the worker already has a WiSACWIS ID and the worker is set active, the worker will appear on the Change Request window. If the worker has a WiSACWIS ID, but the worker has been set inactive, the worker will appear on the Delete Request window. No worker will appear on more than one of the three request windows. If a worker does not appear on any of the three, the worker may not have any information in WiSACWIS. If the worker does have information in WiSACWIS, but does not appear on any of the three request windows, contact the helpdesk or the security liason.

Cancel

The only workers listed on the New Request screen are those who have information in WISACWIS, but who have not yet been given a WISACWIS ID through ePASS.

If you are unable to find the worker in this list or no workers is correct in WISACWIS.

The following worker details are required for each request:

- New Requests: Worker is active but does not have a WISACWIS user ID.
- Change Requests: Worker is active and has a WISACWIS user ID.
- Delete Requests: Worker is inactive and has a WISACWIS user ID.
- New and Change Requests require a valid worker email address and work phone number.

When you change an email address, work phone, location or job class in WISACWIS, the worker's information will automatically change here.

When finished, click [Next](#) to continue.

## — Topic Introduction —

Welcome to the Change Request topic. This topic walks through the procedure for recording worker information that has changed in WiSACWIS, and for changing the security access of a worker that already exists in the ePASS system.

When changing information for a worker, it is important to make any WiSACWIS changes first, if any, and then make changes in ePASS.

A worker with information in WiSACWIS who does not have a WiSACWIS ID will appear on the New Request window. If the worker already has a WiSACWIS ID and the worker is set active, the worker will appear on the Change Request window. If the worker has a WiSACWIS ID, but the worker has been set inactive, the worker will appear on the Delete Request window. No worker will appear on more than one of the three request windows. If a worker does not appear on any of the three, the worker may not have any information in WiSACWIS. If the worker does have information in WiSACWIS, but does not appear on any of the three request windows, contact the helpdesk or the security liason.

The main content area has a light green background and a blue border on the left. It features a section header "— Topic Introduction —" followed by two paragraphs of text and a link to "Next".

**— Topic Introduction —**

Welcome to the Explore topic. This topic shows the procedure for exploring the requests submitted through ePASS. By using Explore, you can see all of the requests that have been submitted in ePASS, view what kind of request it was, where it is in the process and any comments that may be attached to it.

Explore will show all requests, including new requests, change requests, password change requests and delete requests. However, you will only have access to see requests submitted by members of your security group. Generally that means that you will only be able to see requests submitted by your county security delegate or any backup county security delegates. Sometimes, you may see requests submitted by the security liaison or another state DCFS worker on behalf of a county's security delegate.

---

## — Topic Introduction —

Welcome to the Password Reset topic. Resetting, or changing a WiSACWIS login through ePASS is a quick and simple process. Unlike the other requests made through ePASS, there is no human intervention required after you submit the request.

Workers can change their own password in WiSACWIS by choosing "change password" from the login screen when they first open WiSACWIS, before logging in. Password Reset should only be used when a worker forgets his or her password or when security demands that a worker's password be changed.

Cases that might require changing a worker's password include termination of a worker's employment, or if you have reason to believe someone has gained access to a worker's password and that worker is not available to change the password themselves.

Delete Request

The screenshot shows a web browser window titled "ePASS On-line Training - Microsoft Internet Explorer provided by DHFS - State of Wisconsin". The browser's address bar shows the URL "http://apps3.dhfs.state.wi.us/wisacwis/knowledge\_web/index.htm". The page has a green header bar with the following text: "Module: ePASS", "Topic: Delete Request", "Page 01 of 12", and navigation links "Index", "Exit", "Menu", "Prev", and "Next". The main content area has a light green background and a blue border on the left. It features a section header "— Topic Introduction —" followed by four paragraphs of text and a "Next" link.

**— Topic Introduction —**

Welcome to the Delete Request topic. This topic walks through the procedure for removing a worker from WisACWIS.

When changing information for a worker, it is important to mark the worker as inactive in WisACWIS first before using ePASS to delete the worker. You are not allowed to delete a worker that is not inactive.

A delete request does not delete the worker's information from WisACWIS. It does remove the worker's access to WisACWIS. Before the county security delegate requests the deletion of a worker, the worker's supervisor should reassign all of the worker's work and set the worker inactive.

A worker with information in WisACWIS who does not have a WisACWIS ID will appear on the New Request window. If the worker already has a WisACWIS ID and the worker is set active, the worker will appear on the Change Request window. If the worker has a WisACWIS ID, but the worker has been set inactive, the worker will appear on the Delete Request window. No worker will appear on more than one of the three request windows. If a worker does not appear on any of the three, the worker may not have any information in WisACWIS. If the worker does have information in WisACWIS, but does not appear on any of the three request windows, contact the helpdesk or the security liason.

The Delete Request window shows all of the inactive workers available for Deletion. Basic information about each worker is listed to the right of the worker's name. Clicking on a worker's name brings up the Delete Request window for the worker.

Perform this step:

1. In the **Delete Request** box, click the **Charles Xavier** link

Name	Worker ID			
<a href="#">Worker BROWN</a>	9221120	roberi@dhfs.state.wi.us		Brown - Green Bay CPS Case Manager
<a href="#">Supervisor Brown</a>	9221109	roberi@dhfs.state.wi.us		Brown - Green Bay Intake & Assessment Suprv.
<a href="#">Charles Xavier</a>	9225014	xavierc@co.brown.wi.us (920) 892-8928		Brown - Green Bay CPS Disposition Supervisor

Cancel

If you are unable to find the worker in this list or no workers were found then please verify that the worker information is correct in WISACWIS.

The following worker details are required for each request type:

- New Requests: Worker is active but does not have a WISACWIS userid yet.
- Change Requests: Worker is active and has a WISACWIS userid.
- Delete Requests: Worker is inactive and has a WISACWIS userid.
- New and Change Requests require a valid worker email address and work phone number.

Conclusion

The screenshot shows a web browser window titled "ePASS On-line Training - Microsoft Internet Explorer provided by DHFS - State of Wisconsin". The browser's address bar is empty. The page has a green header bar with a DHFS logo on the left. The header text includes "Module: ePASS", "Topic: Delete Request", "Page 12 of 12", and navigation links: "Index", "Exit", "Menu", and "Prev". The main content area has a light green background. It features a section header "— ePASS Summary —" with a horizontal line below it. To the left of the text is a vertical blue line. The text in the summary section reads: "That concludes online instruction for ePASS. For more details on ePASS and how it can be used, consult your ePASS training materials. If you continue to have questions, please contact the helpdesk or the security liason." and "If you wish to review one of the ePASS topics, click the menu button on the top menu bar and choose a new topic. If you wish to exit this tutorial, click the X on the top right corner of the window."
